

CASE STUDY

BLUU SOLUTIONS 30 Cannon Street

"This project was a great success. Any visitor to 30 Cannon Street will be presented with an excellent impression, whichever area of the office they are visiting. We look forward to working with the Floors-2-Go Contract Division again to make it a hat trick of projects!"

Louis Holmes Contract Manager, Bluu Solutions

The Floors-2-Go Contract Division has been going from strength to strength with the completion of its second joint project with office interior specialists Bluu Solutions. When an office refurbishment was scheduled for the fourth floor of London's landmark building at 30 Cannon Street, the Floors-2-Go Contract Division and Bluu Solutions united once again to recreate the success of their HG Capital project.

Louis Holmes, assistant contract manager for Bluu Solutions comments: "Our client had just taken possession of the fourth floor of 30 Cannon Street, Mansion House and to accompany the move, we were asked to design, build and fit out the space to create a corporate environment which also reflected the iconic status of the building as a whole. The right flooring can make a big difference to the look of an interior, so it was essential we used a company who could supply a range of stylish flooring that would also be easy to maintain and able to withstand office foot traffic. We had previously worked with the Floors-2-Go Contract Division on a project for HG Capital and were confident they could complete the job efficiently within our short time frame."

Louis continued: "As our brief required us to fit out the fourth floor in its entirety, we needed a variety of flooring that would be suitable for a range of different areas. The extensive collection of the Floors-2-Go Contract Division offered the perfect selection. Following their expert advice, we chose highly polished Evo Alabastro ceramic tiles for the reception, Ege Nordic carpet tiles for all office floor areas and common areas and Amtico Urban Metal Frost vinyl for the canteen and rest areas."

"We were also provided with additional advice and support throughout the project. For example, the reception area is an unusual shape, much like the building itself, and so Floors-2-Go provided us

with a detailed working drawing of how they would lay the ceramics. This attention to detail really helped to avoid any unnecessary problems and ensure the project was completed on time."

Contracts director for the Floors-2-Go Contract Division, Andy Acton commented: "This project was a great opportunity for us to showcase our range of flooring and commitment to professional floor fitting. The tight one week deadline and schedules of other contractors meant we had to work overnight but this allowed us to place our full focus on the job without being interrupted."
